

Configuração do Wi-Fi **DIR-905L**

Procedimentos para configuração da Rede Wireless

1- Para realizar o procedimento de configuração Wireless WPA, o computador deve estar conectado via cabo Ethernet em uma das portas **LAN** do DIR-905L, e o seu Modem ADSL conectado na porta **Internet** do DIR-905L.

2- Para acessar a página de configuração abra o Internet Explorer, digite na barra de endereços http://192.168.0.1 e tecle **Enter**.

5- Altere os seguintes parâmetros:

Wireless Mode: Wireless Router Habilite a opção Enable Wireless Wireless Network Name (SSID): digite um nome para a rede sem fio Desmarque a opção Enable Auto Channel Selection Wireless Channel: Escolha os canais 1,6 ou 11 (recomendado) Transmission Rate: Best (automatic) Desmarque a opção Enable Hidden Wireless Security Mode: Enable WPA/WPA2 Wireless Security (enhanced) Cipher Type: AUTO (TKIP/AES) PSK/EAP: PSK

Network Key: digite uma senha para a rede sem fio, de no mínimo 8 dígitos e no máximo 63.

Clique em Save Settings.

6- Clique em **Reboot Now.**

Após concluído o **Reboot**, irá voltar para a página inicial. Para confirmar se a conexão Wireless está funcionando corretamente, basta localizar a rede Wireless e conectar-se a ela.

*Caso ocorra algum erro, verifique alguma possível interferência externa ou falha no computador. Tente trocar o canal da rede Wireless em WIRELESS CHANNEL para 6 ou 1 além ou 11. Se possível teste com mais de um computador. Suporte Técnico www.dlink.com.br/suporte
