

Filtro de MAC Address

DIR-505

DIR-505

Procedimentos para configuração do Filtro de MAC Address

- 1- Para realizar essa configuração o computador deve estar conectado ao DIR-505.

2- Abra o navegador de internet e digite na barra de endereços `http://192.168.0.1` e tecele Enter.

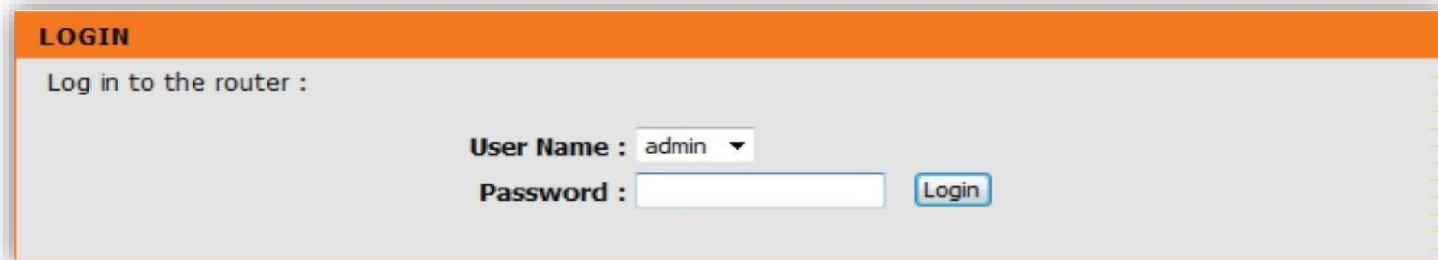

3- Logo em seguida abrirá uma janela de autenticação.

Digite o usuário e senha do equipamento:

User name: admin

Password: (em branco).

Clique em **Login**.

A screenshot of a web page titled 'LOGIN'. The page has an orange header bar with the word 'LOGIN' in white. Below the header, the text 'Log in to the router :' is displayed. There are two input fields: 'User Name : admin' with a dropdown arrow, and 'Password :' followed by an empty text input field. To the right of the password field is a blue 'Login' button.

4- Em seguida clique na guia **Advanced** e no botão **MAC Address Filter** localizado à esquerda da tela.

5- Em Configure **MAC Filtering below**

Selecione a opção **Turn MAC Filtering ON and ALLOW computers listed to access the network**

Wireless Client List: Selecione o computador que deseja libera o acesso.

MAC Address: Digite o MAC Address do computador.

Clique em **Save Settings**

MAC ADDRESS FILTER

MAC ADDRESS FILTER

The MAC (Media Access Controller) Address filter option is used to control network access based on the MAC Address of the network adapter. A MAC address is a unique ID assigned by the manufacturer of the network adapter. This feature can be configured to ALLOW or DENY network/Internet access.

Helpful Hints...
Create a list of MAC address that you would either like to allow or deny access to your network.
Select a MAC address from the drop down menu, then click the arrow to add that MAC address to the list.
Click the Clear button to remove the MAC address from the MAC Filtering list.
